Virtual Parent Empowerment

The teenage brain develops rapidly during the school years and is very susceptible to addictions to substances, pornography, energy drinks, and more! Vaping is especially attractive for teens with over 2.1 million users in grades 6-12. We have invited Cheryl Saunders from the Community Health Division of Salt Lake County Health will help us understand the epidemic of vaping and how to help our kids and other family members to prevent the usage and ways to help our youth be resilient.
